

DAMADA
GROUP

Demolition Services

Building on extensive experience in the Asbestos Removal Industry, Damada Group is a rapidly growing, multi-disciplined contractor that can provide comprehensive solutions to issues faced within the development process. With services including full site investigation (including Asbestos and Land-Contamination), Licensed Asbestos Removal, Demolition and Land Remediation, Damada Group aims to provide our clients with a full turnkey service keeping safety and quality at the centre of all that we do.

Damada Group now has more than 30 years' management experience within the demolition industry across all construction types, from small domestic properties to large industrial complexes and power stations.

Using a variety of demolition methods and access to the latest technically advanced plant and equipment, Damada Group has the expertise and available specialists to demolish any structure or section in a safe and efficient manner, with minimum impact on the surrounding area or environment, regardless of complexity.

In addition to our demolition expertise, Damada Group also has wide experience in façade retention, dismantling and asset recovery. Whether a client wishes to retain part of a building or completely redevelop it, we have the necessary

skills and experience to provide a complete service, from pre-construction advice through to controlled (and risk managed) demolition. This often involves full structural assessment of the building and surrounding land and buildings, together with on-going liaison with third parties such as neighbouring land or property owners.

We offer a complete range of pre-start services from building and land surveying to advice and assistance in project planning, thereby improving efficiency and maximising the cost effectiveness of your project. Through the combination of a dedicated management team, modern equipment and experienced project supervisors, Damada Group can ensure your project is completed to the highest quality, on-time and within budget.

Services include:

- Pre-Construction Advice
- Soft-Strip
- Floor by Floor Demolition
- Controlled Explosive Demolition
- Asset Recovery
- Façade Retention and Temporary Works
